

Information about handling the coronavirus

The health of our participants and employees is a top priority for Audi. We therefore observe the official guidelines and recommended measures at our events and supplement these where needed with additional useful points. In addition, we ask that you observe the generally applicable rules including maintaining the recommended social distancing, wearing a face mask and washing your hands. Please be advised that people who cannot wear a mask can also not participate in the event. The authorization cannot be achieved by a medical certificate.

Please note that in order to participate you have to provide a valid test or a vaccination certificate. Quick test and PCR tests must not be older than 24 hours. For participation with the vaccination certificate you must have already received two shots of the vaccine, whereby the second shot must be received more than 14 days before the event. In this case you do not have to provide a test result.

Also, the obligation to present a corona test will lapse if you are recovered from COVID-19. Recovery is to be certified by a certificate of the order to isolate of the health authority and a following negative COVID-19 test. The test should be at least 28 days old and must not be older than 6 months.

Group size: Group sizes and number of participants adjusted based on official requirements.

Distancing: The seating arrangements in the conference and briefing rooms as well as in restaurants guarantee a distance of 1.5 metres.

Hand sanitiser dispensers are located at the entrances of our event locations.

Face masks: Please observe the official guidelines regarding the wearing of a face mask (FFP2 standard) and also the separate notices posted at our event locations. It is not necessary to wear a face mask in the vehicle during our training.

Vehicle: We offer our trainings for single drivers (one participant per car). Sharing a car with a second participant is only possible during our Audi tour experiences and only if both participants are living in the same household.

High-risk area: If you are coming from a high-risk area for Audi driving experience training for professional or private reasons, we ask you to refrain from participating in order to protect the other participants and our staff. Please contact us if this is the case.

Lodging ban: Official regulations concerning a possible lodging ban must be observed accordingly.

Please check the following points before participating in an Audi driving experience event:

- Has the health authority ordered you to undergo an official quarantine?
- Has the health authority ordered an official quarantine in your immediate surroundings (e.g. family member or other contact person)?

- Have you had flu-like symptoms in the last 48 hours such as fever, coughing, difficulty breathing, frequent sneezing, a heavy cold, painful limbs or a severely impaired sense of taste or smell?

If you answered “yes” to at least one question, we must ask you to contact Audi driving experience and refrain from participating in the event.

If you unexpectedly experience flu-like symptoms while participating in an Audi driving experience event, please report this immediately to the event personnel (instructors and/or event support) and stop participating in the event. The employees of Audi driving experience will introduce further measures accordingly.

If you are found to be infected with the coronavirus after the event, please give the health authorities the email address drive@audi.de or the mobile phone number +49 (0)841 89 32900 so they can contact us and determine any other persons who may have come into contact with you during the event.

Please note that we must comply with local regulatory requirements and provide your contact information to identify possible chains of infection in response to requests from health authorities. During the event, these contact details will be recorded on a separate form that will be destroyed four weeks after the event if no incident occurs.

We care about your health – help us protect it.

Wash your hands thoroughly – for at least 20 seconds

Wash your hands with soap several times a day and take your time when doing so. Avoid touching your mouth, eyes and nose.

Avoid shaking hands

We prefer to offer you our brightest smile and hope you will return it. This is a nice way for us to protect each other.

Coughing – please practice good hygiene

Keep your distance from others when coughing and sneezing. Cough into the crook of your arm, not your hands.

Paper tissues – the better choice

Use paper tissues only once and dispose of them quickly.

Keep a distance – at least 1.5 metres

Please maintain this minimum distance! This way you will protect yourself and others.
