► Audi Q3 48 V Mildhybrid

from 2019

12 V lead acid battery and 48 V Lithium-Ion battery

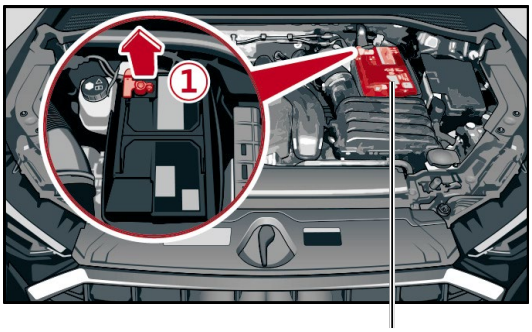
48 V on-board Lithium-Ion battery is automatically deactivated during accidents in which the airbag(s) deployed.

For all other cases, in order to deactivate the on-board power supply the 48 V Lithium-Ion battery has to be separately disconnected in addition to the 12 V lead acid battery. Therefore:

WARNING! Hazard due to electric arc at 48 V

Turn off ignition before separating the 48V battery!

1. Open the bonnet and separate the minus pole of the 12 V battery
2. Remove the cargo floor from the trunk
3. Remove the cover of the 48 V Lithium-ion battery
4. Pull out the communication connector plug of the 48 V Lithium-ion battery
5. Separate the minus pole of the 48 V Lithium-ion battery



12 V lead acid battery
